

[Booth Coating 1780](#) is a water based, fast drying, coating that has been formulated with special resins to provide a hard, clear barrier for protecting paint booth grates, floors and walls.

[Booth Grease #2 Blue](#)

A thick, blue petrolatum based coating that provides a protective barrier for paint booth areas that accumulate heavy amounts of paint overspray and is ideally suited for use on center tracks, flood sheets, curtain walls.

[Booth Grease 2374 Red](#)

A thick, grease type product for application to baffles, back sections, stacks, under booth areas and other locations where a greasy coating is required to prevent adhesion of paint overspray.

[Booth Grease 3151 Green](#)

A thick, green petrolatum based coating that provides a protective barrier for paint booth areas that accumulate heavy amounts of paint overspray. Easily removed with scraping, as the coating remains soft and can be scraped.

[Booth Grease 4550 Gold](#)

A thick, grease type product for application to baffles, back sections, stacks, under booth areas and other locations where a greasy coating is desired to prevent adhesion of paint overspray.

[Booth Grease 4568 White](#)

A thick, white, grease type product for application to baffles, back sections, stacks, under booth areas and other locations where a greasy coating is desired to prevent adhesion of paint overspray.

[Booth Grease 9000](#)

Imparts a smooth wax-like film for use in areas where paint buildups occur such as flood sheets, curtain walls and back sections of paint booths and interiors of paint ventilation stacks.

[Booth Coat 2810](#)

General Chemical's Booth Coat 2810 is a temporary clear peelable coating for paint spray-booth walls, ceilings, floors and other surfaces where paint over spray accumulation must be readily removed...

[Booth Coat 5201](#)

Booth Coat 5201 is a white peelable coating for spray booth walls and ceilings. Booth Coat 5201, once air cured is resistant to water, alkali and paint overspray.

[Booth Coat 5140](#)

Booth Coat 5140 is a clear peelable coating for walls, ceilings, floors, windows and light fixtures. One coating does it all when cured! Booth Coat 5140 is resistant to water, alkali and overspray.

[E-Coat Cleaner 1684](#)

A water based concentrated cleaner designed for use in a spray-recirculation system, formulated to minimize foaming while effectively removing uncured E-Coat sludge.

[E-Coat Cleaner 1910](#)

Provides effective removal of uncured electrostatic paint deposits. Particularly suited to tank cleaning where water dilution is necessary

[E-Coat Cleaner 3555 A & B](#)

A two part E-Coat cleaning system. When both are added to water, produce an effective means of dissolving uncured E-Coat. Designed to give the most effective cleaning of ultra-filtration units.

[E-Coat Cleaner 4770](#)

A thickened version of E-Coat Cleaner 1910 SC particularly suited for vertical retention or whenever prolonged contact time with a surface is required.

[Floor Peel 1820](#)

Clear Temporary Protective Strippable Coating for epoxy floors. It protects floors from build-up of inks, paint over spray and tracking.

[Floor Peel 4000](#)

Clear Temporary Protective Strippable Coating for Industrial floors with Heavy traffic.

[Grate Coating 1775](#)

A water based, fast drying, white grate coating. With special resins to provide a hard, non-chalking barrier that is used to protect paint booth grates, floors, and walls.

[Paint Booth Cleaner 1998](#)

A water based, alkaline cleaner that provides effective removal of uncured solvent or water based paints from paint booth interiors, paint kitchens, and equipment.

[Paint Booth Cleaner 2506](#)

A low viscosity, solvent based cleaner that provides effective removal of paint overspray from paint booth walls and windows.

[Paint Booth Cleaner 4360](#)

A version of Paint Cleaner 1998 with a citrus/vanilla fragrance and contains no alkyl phenol ethoxylates.

[Paint Booth Cleaner 47L](#)

A solvent based, low viscosity, water rinsable paint stripper designed to provide effective removal of two component clear coat (2K) from handling and spray...

[Paint Booth Cleaner 55](#)

A solvent based, low viscosity, solvent based cleaner that provides effective removal of heavy paint overspray from paint booth walls and windows.

[Paint Booth Stripper 410-A](#)

A thickened, water rinsable, solvent based cleaner that provides effective removal of paint over-spray from booth walls and windows.

[Paint Booth Stripper 410-C](#)

A less viscous version of Paint Booth Stripper 410-A.

[Paint Booth Stripper 470](#)

Paint Booth Stripper 470 is a more economical version of PC-47-LT-1.

[Paint Booth Stripper 5410](#)

A thickened, water rinsable, low VOC solvent based cleaner that provides effective removal of paint over-spray from booth walls and windows.

[Paint Booth Stripper 5771](#)

A thickened, water based cleaner designed to remove paint over spray and deposits from booth walls and equipment

[Paint Booth Stripper LT-1](#)

Paint Booth Stripper 47-LT-1 is a thickened version of Paint Booth Cleaner 47-L.

[Paint Cleaner 1590](#)

A water based, paint cleaner that removes dirt, grime and oils from plant floors and equipment. Can be used undiluted or diluted with water.

[Paint Line Cleaner 1920](#)

An aggressive, solvent based, non-chlorinated paint line cleaner designed for "deep cleaning" paint lines.

Paint Line Cleaner 3426

A water based, alkaline paint line cleaner for use in “deep cleaning” water based paint lines...

Tacky Booth Coating 10-HT

A water based, clear tacky coating designed to remain tacky for a long period of time at temperatures up to 180°F

Tacky Booth Coating 10W

A white, water based tacky coating designed to remain tacky for a long period of time to collect airborne contamination in spray booths.

Tacky Booth Coating 2329

A clear, water based, tacky, temporary booth coating that provides an excellent barrier for both water based and solvent based paints.

Tacky Booth Coating 2769

Imparts a lustrous white surface to booth walls and floors while remaining wet and tacky to attack airborne dust and dirt. It can be removed with a water rinse or scraping

Tacky Booth Coating 3228

A water based, soft, clear, temporary, tacky booth coating that provides an excellent barrier for both water based and solvent based paints and is easily removed by scraping.

Tacky Oven Coating 1493

A polymeric based coating, used in high temperature paint ovens, that remains tacky at temperatures up to 325°F for extended periods of time.

Urethane Conditioner 1421-A

A water rinsable, solvent based conditioner designed to prevent two component (2K) clear coat overspray from bonding to various surfaces.
