

MILES #8649 Ambient Powder Strip-THICK

T E C H N I C A L D A T A S H E E T

Description: #8649 is a thickened paint remover formulated to undercut and strip cured Powder Coating from Aluminum, Steel and many Non-Ferrous substrates in 30 minutes to 2 hours at room temperatures.

Directions: Apply #8649 generously by brush, roller or airless spray to surfaces to be stripped, let stand for 30 to 120 minutes. Once coating is softened and undercut, remove with scraper or warm pressure water rinse.

Warning: May be harmful if swallowed. May cause skin and eye irritation. Eye protection and rubber gloves are recommended when handling this product.

First Aid: In case of eye or skin contact flush with large amounts of water for 15 minutes. If irritation persists, see physician. In case of ingestion, do not induce vomiting; drink large quantities of water to dilute product. Get medical attention at once.

Hazard Class: Corrosive Liquid, NOS (contains, glycolic acid), 8, UN 1760, PG II
